

Criteria and Standards Program

Program Manager 256-895-1766

U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG®

The Criteria and Standards Program (CSP), was created by Headquarters, Corps of Engineers to maintain and develop criteria for the U.S. Army Corps of Engineers. The program develops and maintains documents, designs and standards that support not only the Corps, but other Department of Defense agencies, NASA facilities and outside customer needs as well.

The work accomplished under the CSP results in improved construction, rehabilitation, and maintenance/repair projects, which are more cost effective. The CSP umbrella includes the program areas of criteria documents and notice program.

The criteria program maintains the existing inventory of Corps criteria documents (guide specifications, technical manuals, standard designs, others) and develops new criteria documents in technical areas where the need is identified.

The notice program maintains Unified Facilities Guide Specifications (UFGS) through the quarterly update and release of the UFGS data set.

The program includes the operation of the TECHINFO Web system for publication of UFGS and other criteria documents; and maintenance of a master reference publication list and other functions associated with specifications.

Information contained in TECHINFO can be found at <http://www.hnd.usace.army.mil//techinfo/index.htm>.
