## Corps of Engineers' Huntsville Center's Industry IO&T Day set

**HUNTSVILLE, Ala.** -- The U.S. Army Engineering and Support Center, Huntsville's (Huntsville Center) Initial Outfitting and Transition Services Indefinite Delivery/Indefinite Quantity Multiple Award Task Order Contracting Industry Day is set for June 22 at the Beville Center on the campus of University of Alabama-Huntsville from 8 a.m.— 5 p.m.

The event introduces the private sector to upcoming requirement for the replacement IO & T Services MATOC vehicle. Presentations during the event provide an Army Medical Command IO&T Program overview from a customer standpoint and identify specific non-personal services requirements of the replacement IO&T IDIQ MATOC currently under development.

The IO&T Program at Huntsville Center offers a total turn-key project support for the equipping and the transitioning of staff and patients associated with new military healthcare and medical research laboratory facility construction and renovation projects to support requirements of the U.S. Army Medical Department. IO&T provides program/ project management and contracting support to AMEDD locations nationwide and overseas. The IO&T Program provides a wide-range of services to address the multitude of needs of any project to ensure that when the facility is fully operational, it can effectively and efficiently support its mission.

The event also explains to attendees the overall broad scope of Huntsville Center mission and the missions of its Installation Support And Programs Management Directorate's Medical Division and the IO&T Program in particular.

For more information, call Brian Bezilla at 256-895-1973.
