

ELECTRONIC SECURITY SYSTEMS

Program Manager 256-895-1879

U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG®

The Electronic Security Center (ESC) is the premier team for quality oversight and technical expertise for the design, procurement, and installation of Electronic Security Systems (ESS).

Any U.S. Government agency in need of electronic security should contact us to discuss individual requirements and available engineering technical support and contracting opportunities.

We work with the Customer and in-house contracting teammates to develop requirements and issue a Request for Proposal (RFP), resulting in a task order award to a pre-qualified Contractor offering the best value to the Government.

We also offer ESS design courses and Integrated Commercial Intrusion Detection System (ICIDS) training courses for the Army and other U.S. agencies. We are currently developing courses for conducting Electronic Security System Surveys and conducting Performance Verification Testing (PVT).

We offer cradle-to-grave ESS technical services. When requested, we will survey, design, procure, install, test, and maintain systems worldwide.

Army Regulation 190-13 recognizes the ESC as a mandatory center of expertise for electronic security system technical expertise to Army organizations. Through our Mandatory Center of Expertise (ESS-MCX) and Procurement and Installation team, we rapidly deliver products and services, worldwide. Our products and services are available to U.S. Government agencies or affiliates.

ESS installed systems at this Access Control Point.

Services Offered

Security Surveys	Special Studies
Designs and Design Reviews	Procurement and Installation
Criteria and Specification Development	Life-cycle Maintenance and Service
Technical Consultation and Support	ESS Design Training
ICIDS Training	Master Planning
System and Vulnerability Assessments	Technology Transfer
ESS Site Survey Training	ESS PVT Training
