

Introduction

Technical Information for the Design of Facilities (TECHINFO) is an Internet-based system for the dissemination of U.S. Army Corps of Engineers criteria and other information related to the design of facilities. It is a Headquarters, USACE system and is maintained and operated by the U.S. Army Engineering and Support Center, Huntsville.

The system is provided for the use of designers within the Corps of Engineers or for those performing work for the Corps of Engineers. The system can also be used to input suggested revisions to criteria documents found on TECHINFO. A criteria change request is the vehicle users submit to point out errors, notify of needed updates and recommend revisions to guide specifications and other technical publications.

Accessibility

TECHINFO is available through regular Internet software at <http://www.hnd.usace.army.mil/techinfo/index.aspx>.

For additional construction specifications information: Specifications Sub-Community of Practice of the Engineering and Construction (E&C) Community of Practice at <https://ten.usace.army.mil/TechExNet.aspx> or the Whole Building Design Guide at <http://www.wbdg.org/>.

Features:

- *Unified Facilities Criteria (UFC) documents*
- *Unified Facilities Guide Specifications*
- *Technical Manuals*
- *Engineer Regulations (ER)*
- *Engineer Manuals (EM)*
- *Engineer Technical Letters (ETL)*
- *Engineer Circulars*
- *Design Guides and Instructions*
- *Engineering and Construction Bulletins (ECB)*
- *Public Works Technical Bulletins*
- *Engineering software*
- *MILCON Transformation Request for Proposal (RFP) wizard*
- *Whole Building Design Guide (WBDG)*
