## **Huntsville Center employee selected for senior position in Vicksburg**

Date: April 23, 2004

HUNTSVILLE, Ala. -- Michael Rogers, Deputy for Programs and Technical Management at the U.S. Army Corps of Engineers' Engineering and Support Center, Huntsville, was selected for a senior executive service position as the Management Director of the Corps' Mississippi Valley Division in Vicksburg, Miss. Rogers began working with the Corps in 1982 and has also worked at the Corps' Mobile and Alaska Districts. He received a bachelor's degree from the University of Tennessee and worked as an engineer for the Tennessee Valley Authority from 1973 to 1982.

The Mississippi Valley Division is a dual-mission organization with principally civil works and some military program responsibilities in the Mississippi Valley. The division is one of eight Corps regional offices in the United States. Huntsville Center is a major subordinate command of the Corps of Engineers and operates under a charter that is based on programs rather than geography.
