

BANK

General: The bank should be located in the retail/commercial land-use area in the central business district. A service area with a counter shall be provided. Large, reinforced window openings must be provided in the front facade of the bank. An electrical/communication room for power and network hardware shall be provided.

Design Details: See the Layout Detail in the Appendix of this document.

Typical Configuration:

Size:	107 square m (1,152 square ft)
Occupancy:	None
Foundation:	Concrete slab on-grade with turned-down edges or spread footings
Shell:	Reinforced, split-faced, and painted Concrete Masonry Units (CMU)
Roof:	Flat roof with parapet walls and roof hatch
Doors:	Yes
Windows:	Reinforced sill with shutters. No glazing.
Interior Finishes:	Painted
HVAC:	None
Lighting:	Incandescent lighting in all rooms (approximately 30 ft candles)
Lightning Protection:	None
Power:	120/240V single phase, 4-wire power entering the building under ground in rigid steel conduits
Telephone:	None

Data Communication: Fiber optic and/or copper category 6 or better cabling for targetry control and video networking entering and leaving the building underground in rigid steel conduits

Cameras: 2

Target Power Outlets/Cable Jacks: 5
