FOREWORD

These technical instructions (TI) provide design and construction criteria and apply to all U.S. Army Corps of Engineers (USACE) commands having military construction responsibilities. TI will be used for all Army projects and for projects executed for other military services or work for other customers where appropriate.

TI are living documents and will be periodically reviewed, updated, and made available to users as part of the HQUSACE responsibility for technical criteria and policy for new military construction. CEMP-ET is responsible for administration of the TI system; technical content of TI is the responsibility of the HQUSACE element of the discipline involved. Recommended changes to TI, with rationale for the changes, should be sent to HQUSACE, ATTN: CEMP-ET, 20 Massachusetts Ave., NW, Washington, and DC 20314-1000.

TI are effective upon issuance. TI are distributed only in electronic media through TECHINFO Internet site <http://www.hnd.usace.army.mil/techinfo/index.htm> and the Construction Criteria Base (CCB) system maintained by the National Institute of Building Sciences at Internet site <http://www.nibs.org>. Hard copies of these instruction produced by the user from the electronic media should be checked against the current electronic version prior to use to assure that the latest instructions are used.

FOR THE COMMANDER:

DWIGHT A. BERANEK, PE
Chief, Engineering and Construction Division
Directorate of Military Programs

COMMENTARY ON ROOFING SYSTEMS**Table of Contents**

CHAPTER 1. GENERAL	Page
Paragraph 1-1. PURPOSE AND SCOPE.....	1-1
1-2. APPLICABILITY.....	1-1
1-3. REFERENCES	1-1
1-4. CONTENTS.....	1-1
a. Problems	1-1
b. Design Considerations.....	1-1
c. Appendix B (Bibliography)	1-1
 CHAPTER 2. GENERAL SELECTION CONSIDERATIONS	
Paragraph 2-1. STARTING POINTS FOR ROOF SYSTEM SELECTION	2-1
a. New vs Reroofing.....	2-1
b. Steep-Slope vs Low-Slope	2-1
2-2. SELECTION CONSIDERATION FOR STEEP ROOFING SYSTEMS	2-1
a. Aesthetics	2-1
b. Minimum Slope Requirements.....	2-1
c. Categories of Steep Roofing	2-1
d. Snowshedding and Ventilation	2-1
e. Maintenance Requirements.....	2-1
f. Steep Roof Conversions	2-1
2-3. SELECTION CONSIDERATIONS FOR LOW-SLOPE (MEMBRANE) ROOFING	2-2
2-4. REROOFING AND RE-COVERING	2-2
a. Reroofing	2-2
b. Re-cover	2-3
2-5. ENVIRONMENTAL ISSUES	2-3
2-6. DETAILED INFORMATION.....	2-4
2-7. USING PRINCIPLE DESIGN CONSIDERATIONS TO REDUCE THE NUMBER OF POSSIBLE ROOF SYSTEMS	2-4
a. Principal Design Considerations.....	2-4
b. Discussion of Headers (Tables 2-4 and 2-5).....	2-7

c.	Weight Factor	2-8
d.	Compliance with Fire & Wind Requirements.....	2-8
e.	Roof Decking	2-8
f.	Suitability of the Membrane for the Substrate	2-8
g.	Thermal Insulation	2-12
h.	Suitability for Extreme Climates.....	2-13
i.	Installation in Cold or Wet Weather	2-14
j.	Warranties	2-14
k.	Maintenance Considerations	2-14
l.	Roof Access, Fumes and Property Protection When Reroofing	2-14
m.	Installation	2-14
n.	Owner Preferences	2-14
2-8.	CONSIDERATIONS WHEN SPECIFYING LOW-SLOPE (HYDROSTATIC) MEMBRANE ROOFING	2-14
a.	Built-Up Roofing (BUR)	2-15
b.	Polymer Modified Bitumen	2-15
c.	Elastomeric (Single-Ply) Membranes.....	2-15
d.	Weldable Thermoplastic Membranes	2-15
e.	Structural Standing Seam Metal Roofing	2-15
f.	Sprayed-in-Place Polyurethane Foam	2-15
g.	Components of Membrane Roofing Systems.....	2-15
h.	Attachment for Low-Slope Roof Systems	2-16
i.	Labor	2-16
j.	Slope	2-16
2-9.	PRINCIPAL CONSIDERATIONS WHEN SPECIFYING STEEP- SLOPE (WATERSHEDDING) ROOFING	2-17
a.	Aesthetics.....	2-17
b.	Labor Intensity and Labor Skill	2-17
c.	Watershedding.....	2-17
d.	Energy Efficiency	2-18
e.	Durability	2-18
2-10.	ADDITIONAL CRITERIA AND DISCUSSION.....	2-19
a.	Wind	2-19
b.	Ice and Hail.....	2-20
c.	Snow	2-20
d.	Slope	2-20
e.	Vapor, Humidity, Moisture and Condensation.....	2-21
f.	Considerations When Using Thermal Insulation	2-22
g.	Energy and Solar Radiation.....	2-24
h.	Fire Considerations	2-25
i.	Seismic Requirements	2-27
j.	Adequate Design Details.....	2-27
CHAPTER 3. PROTECTED MEMBRANE ROOFING		
Paragraph	3-1. OVERVIEW	3-1

a. Concept of PMR System.....	3-1
b. General Information	3-1
3-2. BUILDING ELEMENTS.....	3-2
a. Slope	3-2
b. Low-Sloped Roofs.....	3-2
c. Structural Considerations	3-2
d. Expansion and Seismic Joints.....	3-2
e. Re-entrant Corners	3-2
f. Roof Access	3-2
g. Roof Venting	3-2
h. Roof Decks	3-2
i. Vapor Retarders.....	3-2
j. Membranes, Filter Fabric and Surfacings	3-3
k. Penetrations.....	3-3
l. Historical Roof Restoration.....	3-3
m. Aesthetics.....	3-3
n. Gaps, Flashings, Joints & Sealants	3-3
o. Drainage, Valley and Intersection Details	3-4
3-3. DESIGN CONSIDERATIONS	3-4
a. Guide Details	3-4
b. Required Details	3-4
3-4. CONSTRUCTION CONSIDERATIONS AND DESIGN ALERTS ..	3-4
a. General.....	3-4
b. Pre-roofing Conference.....	3-4
c. Shop Drawing Submittals	3-5
d. Field Review and Observations	3-5
e. Design Submittal Requirements and Checklist	3-5
3-5. MAINTENANCE CONSIDERATIONS	3-5
a. General.....	3-5
b. Repair or Replace	3-5
c. Repairs: Emergency, Temporary, and Permanent	3-5
d. Repair Work by User.....	3-5
e. Maintenance Checklists	3-6
CHAPTER 4. BUILT-UP ROOFING SYSTEMS	
Paragraph 4-1. OVERVIEW OF BUILT-UP ROOFING SYSTEMS	4-1
a. Components	4-1
b. General Concept.....	4-1
4-2. BUILDING ELEMENTS.....	4-2

a.	Slope	4-2
b.	Structural Considerations	4-2
c.	Expansion Joints, Seismic Joints, and Area Dividers	4-2
d.	Re-entrant Corners	4-3
e.	Roof Access	4-3
f.	Roof Venting	4-3
g.	Roof Decks	4-3
h.	Vapor Retarders.....	4-3
i.	Thermal Insulation and Heat Flow	4-4
j.	Membranes and Surfacings.....	4-4
k.	Penetrations and Flashings.....	4-5
l.	Historical Roof Restoration.....	4-5
m.	Aesthetics.....	4-5
n.	Gaps, Flashings, Joints and Sealants.....	4-5
o.	Drainage, Valley and Intersection Details	4-6
4-3. DESIGN CONSIDERATIONS AND ALERTS		4-6
a.	Attachment	4-6
b.	Phased Construction.....	4-6
c.	Bitumen Compatibility	4-6
d.	Walkways	4-6
e.	Equiviscous Temperature Concept.....	4-6
f.	Coal Tar Pitch Slope	4-6
g.	Flood Coat	4-7
4-4. CONSTRUCTION CONSIDERATION AND FIELD ALERTS		4-7
a.	General.....	4-7
b.	Pre-roofing Conferences	4-8
c.	Shop Drawing Submittals	4-9
d.	Design Submittal Requirements	4-9
e.	Field Review and Observation.....	4-9
4-5. MAINTENANCE CONSIDERATIONS		4-9
a.	General.....	4-9
b.	Repair or Replace	4-9
c.	Repairs: Emergency, Temporary, Permanent.....	4-9
d.	Repair Work by User.....	4-9
e.	Checklists	4-9
CHAPTER 5. MODIFIED BITUMEN ROOFING SYSTEMS		
Paragraph 5-1. MB ROOFING SYSTEMS.....		5-1
a.	Overview.....	5-1
b.	General.....	5-1
5-2. BUILDING ELEMENTS.....		5-2

a.	Slope	5-2
b.	Low-Sloped Roofs.....	5-2
c.	Steep Sloped Roofs	5-2
d.	Structural Considerations	5-2
e.	Expansion Joints, Seismic Joints and Area Dividers	5-2
f.	Re-entrant Corners	5-2
g.	Roof Venting	5-2
h.	Roof Decks	5-3
i.	Vapor Retarders.....	5-3
j.	Thermal Insulation and Heat Flow	5-3
k.	Membranes and Surfacings.....	5-4
l.	Penetrations and Flashings	5-5
m.	Historical Roof Restoration.....	5-5
n.	Aesthetics	5-5
o.	Gaps, Flashings, Joints and Sealants.....	5-5
p.	Drainage, Valley and Intersection Details	5-5
5-3. DESIGN CONSIDERATIONS AND ALERTS		5-6
a.	Attachment	5-6
b.	Phased Construction.....	5-6
c.	Adhesion Type.....	5-6
d.	Walkways	5-6
e.	Equiviscous Temperature.....	5-6
f.	Flashings	5-6
g.	Overlay Boards	5-6
5-4. CONSTRUCTION CONSIDERATIONS AND FIELD ALERTS.....		5-6
a.	General.....	5-6
b.	Pre-Roofing Conference.....	5-7
c.	Shop Drawing Submittals	5-7
d.	Design Submittal Requirements and Checklist	5-7
e.	Field Review and Observation.....	5-7
5-5. MAINTENANCE CONSIDERATIONS		5-7
a.	General.....	5-8
b.	Repair or Replace	5-8
c.	Repairs: Emergency, Temporary, Permanent.....	5-8
d.	Repair Work by User.....	5-8
e.	Checklists	5-8
CHAPTER 6. ELASTOMERIC (EPDM) ROOFING SYSTEMS		
Paragraph 6-1. ELASTOMERIC SYSTEMS		6-1
a.	Overview.....	6-1
b.	General.....	6-1
6-2. BUILDING ELEMENTS.....		6-2

a.	Slope	6-2
b.	Low-Sloped Roofs.....	6-2
c.	Steep Roofs.....	6-2
d.	Structural Considerations	6-2
e.	Expansion Joints, Seismic Joints and Area Dividers	6-2
f.	Re-entrant Corners	6-2
g.	Roof Access	6-2
h.	Roof Venting	6-3
i.	Roof Decks	6-3
j.	Vapor Retarders.....	6-3
k.	Thermal Insulation and Heat Flow	6-3
l.	Membranes and Surfacings.....	6-4
m.	Penetrations and Flashings.....	6-4
n.	Historical Roof Restoration.....	6-4
o.	Aesthetics.....	6-4
p.	Gaps, Flashings, Joints, and Sealants.....	6-4
q.	Drainage, Valley and Intersection Details	6-4
6-3. DESIGN CONSIDERATIONS AND ALERTS		6-5
a.	Attachment	6-5
b.	Phased Construction.....	6-5
c.	Protective Walkways.....	6-5
d.	Contamination.....	6-5
e.	Wind Design	6-5
6-4. CONSTRUCTION CONSIDERATIONS.....		6-6
a.	General.....	6-6
b.	Pre-roofing Conference.....	6-6
c.	Shop Drawing Submittals	6-6
d.	Design Submittal Requirements and Checklist	6-6
e.	Field Review and Observation.....	6-6
6-5. MAINTENANCE CONSIDERATIONS		6-6
a.	General.....	6-6
b.	Repair or Replace	6-7
c.	Repairs: Emergency, Temporary, Permanent.....	6-7
d.	Repair Work by User.....	6-7
e.	Checklists	6-7
CHAPTER 7. WELDABLE (THERMOPLASTIC) ROOFING SYSTEMS		
(Including PVC, CSPE, TPO)		
Paragraph 7-1. OVERVIEW OF WELDABLE SINGLE-PLY SYSTEMS		7-1
a.	General.....	7-1
b.	Climate/Weather	7-2
c.	Logistics.....	7-2
d.	Familiarity with the System and Site.....	7-2

e. Life Expectancy	7-2
f. Costs	7-2
7-2. BUILDING ELEMENTS	7-2
a. Slope	7-2
b. Low-Sloped Roofs.....	7-2
c. Steep Roofs.....	7-2
d. Structural Considerations	7-2
e. Expansion Joints, Seismic Joints and Area Dividers	7-2
f. Re-entrant Corners	7-3
g. Roof Access	7-3
h. Roof Venting	7-3
i. Roof Decks	7-3
j. Vapor Retarders.....	7-3
k. Thermal Insulation and Heat Flow	7-4
l. Membranes and Surfacings.....	7-4
m. Penetrations and Flashings	7-4
n. Historical Roof Restoration.....	7-4
o. Aesthetics	7-4
p. Gaps, Flashings, Joints, and Sealants.....	7-5
q. Drainage, Valley and Intersection Details	7-5
7-3. DESIGN CONSIDERATIONS AND ALERTS	7-5
a. Attachment	7-5
b. Phased Construction.....	7-5
c. Protective Walkways.....	7-6
d. Compatibility	7-6
7-4. CONSTRUCTION CONSIDERATIONS.....	7-6
a. General.....	7-6
b. Pre-roofing Conference.....	7-6
c. Shop Drawing Submittals	7-6
d. Design Submittal Requirements and Checklist	7-6
e. Field Review and Observation.....	7-6
7-5. MAINTENANCE CONSIDERATIONS	7-7
a. General.....	7-7
b. Repair or Replace	7-7
c. Repairs	7-7
d. Repair Work by User.....	7-7
e. Maintenance Checklists	7-7
CHAPTER 8. CONSIDERATIONS FOR STEEP ROOFING SYSTEMS (Shingles, Shakes, Tile and Slate)	
Paragraph 8-1. STEEPLY SLOPED ROOFING SYSTEMS	8-1

a. Overview.....	8-1
b. General.....	8-1
8-2. BUILDING ELEMENTS	8-2
a. Slope	8-2
b. Low-Sloped Roofs.....	8-2
c. Steep Roofs.....	8-2
d. Structural Considerations	8-2
e. Expansion and Seismic Joints.....	8-3
f. Re-entrant Corners	8-3
g. Roof Access	8-3
h. Roof Venting	8-3
i. Roof Decks	8-3
j. Underlayment	8-3
k. Vapor Retarders.....	8-4
l. Penetrations.....	8-4
m. Historical Roof Restoration.....	8-4
n. Aesthetics.....	8-4
o. Flashings, Counterflashings and Closures.....	8-4
p. Drainage, Valley and Intersection Details	8-4
8-3. DESIGN CONSIDERATIONS	8-5
a. NRCA Details.....	8-5
b. Decking.....	8-5
c. Asphalt Products.....	8-5
d. Tile	8-5
e. Slate	8-5
f. Metals.....	8-5
g. Wood Shingles and Shakes	8-5
h. Military References/Guide Specifications.....	8-5
i. ASTM Specifications	8-5
8-4. CONSTRUCTION CONSIDERATIONS.....	8-6
a. General.....	8-6
b. Pre-roofing Conference	8-6
c. Shop Drawing Submittals	8-6
d. Design Submittal Requirements and Checklist	8-6
e. Field Review and Observation.....	8-7
8-5. MAINTENANCE CONSIDERATIONS	8-8
a. General.....	8-8
b. Repair or Replace	8-9
c. Repairs: Emergency, Temporary, Permanent.....	8-9
d. Repair Work by User.....	8-9
CHAPTER 9. METAL ROOFING	
Paragraph 9-1. OVERVIEW OF METAL ROOFING	9-1

a.	Terminology	9-1
b.	Climate/Weather	9-2
c.	Logistics.....	9-2
d.	Familiarity with the System and Site.....	9-3
e.	Life Expectancy and Cost.....	9-3
f.	Occupancy Considerations.....	9-3
	9-2. BUILDING ELEMENTS	9-3
a.	Slope	9-3
b.	Low-Sloped vs Steep Roofs	9-4
c.	Low-Sloped Roofs.....	9-4
d.	Steep Roofs.....	9-4
e.	Structural Considerations	9-4
f.	Expansion Joints and Seismic Joints.....	9-4
g.	Re-entrant Corners	9-4
h.	Roof Access	9-4
i.	Roof Venting.....	9-4
j.	Roof Decks	9-5
k.	Vapor Retarders.....	9-5
l.	Thermal Insulation and Heat Flow	9-5
m.	Membranes.....	9-5
n.	Roof Penetrations	9-5
o.	Historical Roof Restoration.....	9-5
p.	Aesthetics	9-5
q.	Gaps, Flashings, Joints, Fasteners, and Sealants	9-6
r.	Drainage, Valley and Intersection Details	9-6
	9-3. DESIGN CONSIDERATIONS AND ALERTS	9-7
a.	Sealants.....	9-7
b.	Joint Movement	9-7
c.	Oil-canning.....	9-7
d.	Noise	9-7
e.	Air Exfiltration.....	9-7
f.	Minimum Slopes for Cold Regions.....	9-7
	9-4. CONSTRUCTION CONSIDERATIONS.....	9-7
a.	General.....	9-8
b.	Pre-roofing Conference	9-8
c.	Shop Drawing Submittals	9-8
d.	Design Submittal Requirements and Checklist	9-8
e.	Field Review and Observation.....	9-8
	9-5. MAINTENANCE CONSIDERATIONS	9-8
a.	General.....	9-8
b.	Repair or Replace	9-8
c.	Repairs: Emergency, Temporary, Permanent.....	9-9

d. Repair Work by User.....	9-9
e. Maintenance Checklists	9-9

CHAPTER 10. COPPER AND OTHER CRAFTED METALS

Paragraph 10-1. COPPER AND OTHER CRAFTED METALS	10-1
a. Overview.....	10-1
b. General.....	10-2
10-2. BUILDING ELEMENTS.....	10-2
a. Slope	10-2
b. Low-Sloped Roofs.....	10-2
c. Steep Roofs.....	10-2
d. Structural Considerations	10-2
e. Expansion and Seismic Joints.....	10-2
f. Re-entrant Corners	10-2
g. Roof Access	10-2
h. Roof Venting.....	10-3
i. Roof Decks	10-3
j. Underlayment	10-3
k. Vapor Retarders.....	10-3
l. Penetrations.....	10-3
m. Historical Roof Restoration.....	10-3
n. Aesthetics	10-3
o. Gaps, Flashings, Joints, and Sealants.....	10-4
p. Drainage, Valley and Intersection Details	10-4
10-3. DESIGN CONSIDERATIONS	10-4
a. Guide Details/Resources.....	10-4
b. Substrates	10-4
c. Nailers	10-4
d. Pan Clearance	10-4
e. Low-Slope Locking Strip.....	10-4
f. Military Reference/Guide Specifications	10-4
10-4. CONSTRUCTION CONSIDERATIONS.....	10-5
a. General.....	10-5
b. Pre-roofing Conference.....	10-5
c. Shop Drawing Submittals	10-5
d. Design Submittal Requirement, Checklists and Design Alerts	10-5
e. Field Review and Observation.....	10-6
10-5. MAINTENANCE CONSIDERATIONS	10-6
a. General.....	10-6
b. Repair or Replace	10-6
c. Repairs: Emergency, Temporary, Permanent.....	10-6

d. Repair Work by User.....	10-7
e. Corrosion	10-7
f. Maintenance Checklists	10-7

CHAPTER 11. REROOFING CONSIDERATIONS AND CRITERIA

Paragraph 11-1. OVERVIEW OF REROOFING	11-1
a. General.....	11-1
b. Climate/Weather	11-2
c. Logistics.....	11-2
d. Familiarity with the System and Site.....	11-3
e. Life Expectancy and Costs.....	11-3
f. Occupancy Considerations.....	11-3
g. Low-Sloped vs Steep Roofs	11-3
11-2. BUILDING ELEMENTS.....	11-3
a. Slope	11-3
b. Low-Sloped Roofs.....	11-3
c. Steep Roofs.....	11-3
d. Structural Considerations	11-3
e. Expansion and Seismic Joints	11-4
f. Re-entrant Corners	11-4
g. Roof Access	11-4
h. Roof Venting	11-4
i. Roof Decks	11-4
j. Underlayment	11-4
k. Vapor Retarders.....	11-4
l. Thermal Insulation and Heat Flow	11-4
m. Membranes.....	11-5
n. Penetrations.....	11-5
o. Historical Roof Restoration.....	11-5
p. Aesthetics	11-5
q. Gaps, Flashings, Joints, and Sealants.....	11-5
r. Drainage, Valley and Intersection Details	11-5
11-3. DESIGN DETAILS AND ALERTS	11-5
a. Assessment	11-5
b. Roof Replacement	11-6
c. Roof Re-cover.....	11-6
11-4. CONSTRUCTION CONSIDERATIONS AND ALERTS.....	11-6
a. General.....	11-7
b. Pre-roofing Conference	11-7
c. Shop Drawing Submittals	11-7
d. Design Submittal Requirements and Checklists.....	11-7
e. Field Review and Observation.....	11-9
11-5. MAINTENANCE CONSIDERATIONS	11-9

a. General.....	11-9
b. Repair or Replace	11-9
c. Repairs: Emergency, Temporary, Permanent.....	11-9
d. Maintenance Checklists	11-9

CHAPTER 12. ROOF MAINTENANCE

Paragraph 12-1. OVERVIEW OF ROOF MAINTENANCE	12-1
a. General.....	12-1
b. Inspection and Maintenance.....	12-1
12-2. BUILDING ELEMENTS	12-2
a. Slope	12-2
b. Low-Sloped Roofs.....	12-2
c. Steep Roofs.....	12-2
d. Structural Considerations	12-2
e. Expansion and Seismic Joints.....	12-2
f. Re-entrant Corners	12-3
g. Roof Access	12-3
h. Roof Venting	12-3
i. Roof Decks and Nailers.....	12-3
j. Underlayment	12-3
k. Vapor Retarders.....	12-3
l. Penetrations.....	12-3
m. Historical Roof Restoration.....	12-4
n. Aesthetics.....	12-4
o. Gaps, Flashings, Joints, and Sealants.....	12-4
p. Drainage, Valley and Intersection Details	12-4
12-3. DESIGN CONSIDERATIONS FOR ROOF MAINTENANCE	12-4
a. Roof Traffic	12-4
b. Low Maintenance Details	12-4
c. Periodic Inspection.....	12-4
12-4. CONSTRUCTION CONSIDERATIONS.....	12-4
a. General.....	12-4
b. Pre-roofing Conference	12-4
c. Shop Drawing Submittals	12-5
d. Design Submittal Requirements and Checklist	12-5
e. Field Review and Observation.....	12-5
12-5. MAINTENANCE CONSIDERATION.....	12-5
a. General.....	12-5
b. Repair or Replace	12-5
c. Repairs: Emergency, Temporary, Permanent.....	12-5
d. Checklists	12-5

APPENDICES

Appendix	Title	
2-1	Roof Slopes and Fire Ratings for Various Materials	2-28
4-1	Equiviscous Temperature (EVT)/NRCA Bulletin.....	4-10
4-2	Recommended Agenda for Pre-roofing Conferences Pertaining to Membrane Roofing Systems	4-12
6-1	SPRI Test Method RE-1	6-8
7-1	Shattering of Aged Unreinforced PVC Roof Membranes	7-8
11-1	Suggested Agenda for a Reroofing Conference	11-10
A	References.....	A-1
B	Bibliography	B-1
C	Acronyms.....	C-1
D	Glossary.....	D-1
E	Metric Guide.....	E-1

FIGURES

Figure	Title	
2-1	Material and Roofing System Options.....	2-32
2-2	Steep Roofing (Hydrokinetic)	2-33
2-3	Low-Slope (Hydrostatic)	2-33
2-4	Typical BUR System	2-34
2-5	Polymer-Modified Cap Sheet Adhered to Mechanically Fastened Base Sheet	2-34
2-6	EPDM Roof System	2-35
2-7	PVC Roof System	2-35
2-8	Structural Standing Seam Metal Roofing	2-36
2-9	Components of Membrane Roofing System.....	2-36
2-10	Wall Base and Cap Flashing	2-37
2-11	Architectural Metal Seams.....	2-37
2-12a	Self-Adhesive Eaves Flashing	2-38
2-12b	Underlayment for Steep Roofing.....	2-38
2-13	Vented Attic Space.....	2-39
2-14a	Interior Relative Humidites.....	2-39
2-14b	Temperature Conversions	2-40
2-15	Under Deck Insulation	2-40
2-16	Self-Insulating Roof Deck	2-41
2-17	Protected Roof Membrane System (PMR).....	2-41
2-18	Roofing Over Thick Seismic Strap	2-42
3-1	Conventional vs Protected Membrane Roofs	3-7
3-2	Roof Drain for PMR System	3-8
3-3	Protected Base Flashing	3-8
4-1	Raised Curb Expansion Joint.....	4-16
4-2	Raised Curb Area Divider.....	4-16
4-3	Headlap and Exposure in a 3-Ply BUR System.....	4-17
8-1	Types of Clay Tile	8-10
8-2	Types of Concrete Tile	8-10
8-3	Typical Asphalt Shingles	8-11

8-4	Typical Asphalt Rolls	8-12
8-5	Cold, Ventilated Roof Above a Cathedral Ceiling	8-13
8-6	Comparison of Steep Roofing Systems	8-13
8-7	Pipe Penetration.....	8-14
8-8a	Application of Roofing Nails.....	8-14
8-8b	Application of Roofing Staples.....	8-15
9-1	Metal Roof Panels and Clips	9-11
9-2a	Factory Sealant in Vertical Rib System.....	9-12
9-2b	Factory Sealant in Trapezoidal Rib System	9-12
9-3	Expansion Joint with Step	9-13
9-4	Rigid Foam Thermal Spacer Block	9-13
9-5	Fixed Curb to Support Heavy Rooftop Units with Floating Base Flashing	9-14
9-6	Pipe Penetration Boot for Standing Seam Roof Panel	9-14
9-7	Wall Flashing with Wall Parallel to Panel Seams	9-15
9-8	Headwall Transition.....	9-15
9-9	Placement of Endlap Sealant	9-16
10-1	Flat Pan Roofing System.....	10-8
10-2	Low Pitch Transverse Seam for Flat Pan System	10-8
11-1	Sloped Roof Conversions	11-14
11-2	SSSMR Reroof Over Built-Up Roof	11-14
12-1	Clearances Between Pipes/Walls/Curbs	12-6
12-2	Curbed Enclosure for Piping Through Roof Deck.....	12-6
12-3	Use of Two-Piece Metal Counterflashing	12-7
12-4	Watershedding Rain Collar for a Penetration (Pitch Pocked)	12-7
12-5	Use of Curb for Base Flashing, Independent of Wall Movement ..	12-8
12-6	Coping Sloped to Shed Water	12-8
12-7a	Metal Gravel Stop/Fascia	12-9
12-7b	Metal Fascia Cap	12-9
12-8	Metal Intersections	12-10

TABLES

Table	Title	
2-1	Steep Slope Selection Based Upon Use Criteria.....	2-2
2-2	Preserving the Environment—Steep Roofing	2-3
2-3	Preserving the Environment—Low-Slope Roofing.....	2-4
2-4	Principle Design Considerations—Steep Roofing.....	2-5
2-5	Principle Design Considerations—Low-Slope Roofing	2-6
2-6	Typical Weights of Material and Equipment	2-9
2-7	Fire Ratings and Required Underlays for Steep-Sloped Roof Systems.....	2-10
2-8	Fire Ratings and Required Underlays for Low-Sloped Roof Systems.....	2-11
2-9	Suitability of the Roof Deck for Various Conditions	2-12
2-10	Membrane/Substrate Compatibility/Attachment Methods	2-12
2-11	Suitability of Roof Insulation for Method of Use.....	2-13
2-12	Some Typical Slope Limitations for Low-Slope Roof Systems.....	2-17
2-13	Minimum Slopes for Typical Steep Roof Systems.....	2-18
2-14	Mean Durability of Common Steep Roofing	2-19

2-15	Typical Indoor Relative Humidity in Winter.....	2-21
2-16	Unit Resistances (i.e., Resistivity) of Common Roof Insulations...	2-22
2-17	Equivalent Temperature Difference	2-25
4-1	Maximum Slope Recommended in ASTM D312	4-7
8-1	Weight of Common Slate and Tile Roofings.....	8-3
9-1	Minimum Slope for Metal Roofing.....	9-3
10-1	Properties of Crafted Metals.....	10-1
11-1	Typical Code—Allowable Reroofs Over Existing Roofing.....	11-2
